

BIOBUZZ: HEXABBLE™

The Premier Strategic Hexagonal Crossword Game • Ages 8+ • 2–4 Players • 30–45 Mins

GAME OBJECTIVE:

Score the most points by forming interconnected words on the 127-cell hexagonal gameboard, maximizing high-value bonus multiplier pockets.

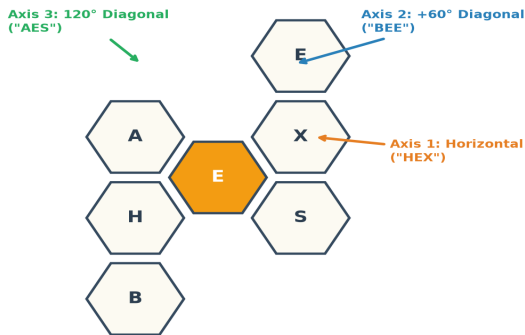

COMPONENTS:

- **127-Cell Honeycomb Board** (Push-together 4 quadrants)
- **100 BioBuzz Letter Tiles** with standard Scrabble values
- **4 Ergonomic Hex Tile Racks** (Holds 7–8 tiles each)
- **Tile Draw Bag & Score Pad**

GAMEPLAY FLOW:

1. Each player draws **7 tiles** onto their rack.
2. **First Word:** Must cover the center Star cell (★).
3. **Subsequent Words:** Must hook onto or cross at least one existing tile on the board along one of the 3 hex axes.
4. End of turn: Calculate score, draw back up to 7 tiles.

HEXABBLE: 3 Valid Word Placement Axes
(Words must travel in straight contiguous lines along 1 of 3 axes)

BOARD BONUS MULTIPLIER POCKETS:

- **TW (Triple Word - Gold):** 6 outer apex corners! Triples the entire word score.
- **DW (Double Word - Blue):** 18 strategic connector cells. Doubles the entire word score.
- **TL (Triple Letter - Orange):** 6 flat edge midpoints. Triples that specific letter value.
- **DL (Double Letter - Green):** 26 central swarm cells. Doubles that specific letter value.
- **★ (Center Star):** Counts as a Double Word (DW) for the opening play!

SPECIAL BONUSES:

- **Hive Flush (+50 Pts):** Use all 7 tiles in one turn!
- **Multi-Word Multiplier:** If a tile forms words in 2 or 3 directions simultaneously, its bonus applies to all words formed!

THE 3 HEXAGONAL AXES OF PLAY:

Every word played must lie in a single unbroken straight line along one of the 3 honeycomb axes:

- **Horizontal (0°):** West to East.
 - **Positive Diagonal (+60°):** Southwest to Northeast.
 - **Negative Diagonal (120°):** Northwest to Southeast.

3-WAY CROSSINGS: In Hexabble, up to **3 words** can intersect through a single shared letter tile! Every word created in any direction must be a valid dictionary word.

GAME END: The game ends when the draw bag is empty and one player uses all their rack tiles, or when no legal plays remain. Highest total score wins!

■ **HEXABBLE PRO-STRATEGY:** The 6 outer TW corners are game-winning power positions. Defend open pathways toward the TW corners, and look for 3-way crossing hubs where a single high-value tile (Z, Q, X) scores in multiple directions!
