

# BIOBUZZ: HEXELLO™

The Tactical 6-Axis Hexagonal Bio-Swarm Reversi Game • Ages 7+ • 2 Players • 15–20 Mins

## GAME OVERVIEW:

A game of territory, trapping, and dramatic reversals! Outflank your opponent's pieces across **6 hexagonal directions** to flip their tiles to your side. Control the most tiles when the board is full to win!

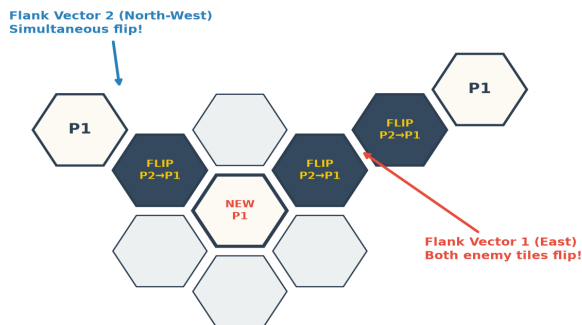

## GAME COMPONENTS:

- **61-Cell Tournament Hex Othello Board** (Radius R=5)
- **60 Double-Sided Reversible Game Pieces:**
  - **Side A (Light Team):** Ivory Base + Dark BioBuzz Rosette
  - **Side B (Dark Team):** Charcoal Base + Ivory BioBuzz Rosette

## STARTING SETUP:

Place 6 starting pieces in the center rosette, alternating teams in a circle around the center pivot (3 Light / 3 Dark). Light Team moves first.

**HEXELLO: 6-Axis Flanking & Multi-Line Capture**  
(Placing 1 tile captures enemy pieces in multiple hex directions)

## CORE RULES & FLANKING MECHANICS:

1. **Legal Move Requirement:** You **MUST** place a piece in an empty pocket such that it traps one or more enemy pieces in a straight line between your new piece and another piece of your color.
2. **6 Flanking Directions:** Flanking can occur along any of the 6 hex vectors (East, West, NE, NW, SE, SW).
3. **Multi-Directional Flips:** If your move flanks enemy pieces in multiple directions at once, **ALL trapped pieces in all lines flip simultaneously!**
4. **Must Pass if No Moves:** If you have no legal flanking move, you must pass your turn. Play continues until both players cannot move.

## CORNER ANCHORS & PERIMETER TACTICS:

- **The 6 Apex Corner Anchors (Gold Rings):** Once you capture a corner pocket, that piece can NEVER be outflanked or flipped for the rest of the game! Corners are permanent anchors.
- **The Danger Zone (C-Squares):** Beware placing pieces in pockets directly adjacent to an open corner—it often gifts the corner to your opponent on their next turn!

## ENDGAME & SCORING:

The game ends when all 61 cells are filled or neither player can make a legal move. Both players count their face-up pieces. **The player with the most pieces wins!**

■■ **HEXELLO PRO-STRATEGY:** Early in the game, do not maximize flips! Having fewer pieces in the opening gives your opponent fewer targets to flank. Control the inner core, force your opponent to play on the perimeter, and seize the 6 corner anchors!
