

HEX-TILES: OFFICIAL COMPENDIUM OF GAMES

5 Original & Classic Games for 1.5" Hexagonal Letter & Number 3D Printed Tiles

GAME 1: HEX-WORDS (Free-form Tabletop Crossword)

Players: 2–4 • **Time:** 30–45 min • **Components:** Letter Tiles with Point Subscripts

Hex-Words expands traditional crossword play into **3 continuous axes (0°, 60°, 120°)** without requiring a fixed board. Tiles connect edge-to-edge on any flat table.

Gameplay & Rules:

- **Hand Size:** Each player draws 7 tiles from the face-down pool into their hand.
- **First Word:** Player 1 places a valid word of 2+ letters anywhere in the center of the table.
- **Turn Actions:** On your turn, place 1 or more tiles to form new connected words along any of the 3 hex axes. Every newly formed line of adjacent tiles must form a valid dictionary word.
- **The 3 Hex Axes:** Words are read straight in any of the 3 hexagonal grid directions (Left-to-Right, Top-Left to Bottom-Right, Bottom-Left to Top-Right).

• **Honeycomb Bonus (+15 Pts):** If your placed tiles complete a closed 6-tile hexagonal ring surrounding an open center (a 'Honeycomb Cell'), immediately score a +15 point bonus!

- **Tri-Intersection Bonus (2x Total):** If a single placed tile simultaneously completes words along all 3 axes, double the entire turn's score.

GAME 2: HIVE-SWARM (Real-Time Speed Word Race)

Players: 2–6 • **Time:** 10–15 min • **Components:** Complete Letter Pool

A high-octane, simultaneous speed race where players compete to build their own independent hexagonal honeycombs with zero turn waiting.

Bee-Themed Rules & Terminology:

- **The Meadow:** Place all letter tiles face-down in the center of the table (the 'Meadow'). Each player draws 12 tiles.
- **The Launch:** Any player shouts 'SWARM!'. All worker bees simultaneously flip their tiles and race to connect all letters into a continuous personal honeycomb.
- **Gathering Pollen (Foraging):** When a player successfully connects all their current tiles into valid words, they shout 'FORAGE!' (or 'POLLEN!'). Every player must immediately draw 1 additional tile from the Meadow.
- **Ejecting Bad Letters:** If a player gets stuck with difficult letters, they may shout 'EJECT!', discard 1 troublesome tile back into the Meadow, and draw 2 new random tiles.

• **Winning the Crown:** When fewer tiles remain in the Meadow than players, the first worker to lock all their tiles into valid connected words shouts 'QUEEN'S COMB!' to freeze the round and win!

GAME 3: NUMBER HIVE / EQUATION CLASH

Players: 2–4 • **Time:** 20–30 min • **Components:** Number (0–9) and Math Symbol (+, -, x, /, =) Tiles

A strategic numerical game where players build intersecting equations across the 3 hex axes.

Gameplay & Rules:

- **Hand Size:** Each player draws 6 Number tiles and 2 Math Symbol tiles.
- **Valid Equations:** Equations must read in a straight hex line from left-to-right or top-to-bottom (e.g. [3] [+] [5] [=] [8] or [9] [x] [4] [=] [3] [6]).
- **Branching Math:** You may connect new equations through any existing number on the table (e.g. using the [8] from above to build [8] [x] [2] [=] [1] [6]).
- **Scoring:** Points awarded equal the calculated result of your equation, plus +5 bonus points for using multiplication [x] or division [/].

GAME 4: HONEYCOMB CROSSWORD (Board Game)

Play with the included **1.5" Hexagonal Game Board**. Start on the center Star (★) and expand outwards to capture **2x Letter (2L)**, **3x Letter (3L)**, **2x Word (2W)**, and **3x Word (3W)** perimeter hexes!

GAME 5: TARGET 24 & ROSETTE MATH (Solo / Co-op)

Using 6 perimeter numbers and math operators around a central target hex, create an equation loop that evaluates to exactly 24 (or the target number). Use the included printable puzzle sheets for daily brain challenges!
